

Sunvitol® E500

Delivering 500 IU (336mg/g) d-alpha tocopherol

Most natural form of vitamin e

Unlike Soybean derived d-alpha tocopherol, our Sunvitol E500 does not go through a chemical synthesis and thus provides the most natural form of vitamin e. Soybean vitamin e is synthesized from gamma tocopherol and converted into d-alpha.

Application- Free flowing powder for gummies, tablets, capsules, and powder

Sunvitol E500 is a proven versatile powder with multiple applications for all industries. Our powder material is stable in various formats and mixes well in various formulations.
